

Employee Excellence

This month's Champion Employee of Excellence is Jenny Crist. What Jenny loves the most about MHLC is that she spend each day making a difference for patients and their families that she know and sees every day within the

community. Caring and assisting them though difficult and scary moments. Treating them as she would want her loved one treated. At larger hospitals patients are sometimes a number, but at MHLC we definitely work hard behind the scenes to get things done for patients to help them through these moments. Jenny enjoys the different types of imaging exams that challenge her in her job. General Radiology, CT Imaging, Mammography and many other daily duties that keep us busy. Jenny has worked in the Radiology Department at MHLC for almost 24 years.

Her coworkers state that her dedication to this organization is amazing. She is a great resource for newer tech's to our department with her years of service. Jenny is the lead Mammography Tech and goes that extra mile for this program. The countless hours of self-teaching through our MagView program, tracking all the Mammo tech's and Radiologist's numbers to make sure they are up to state standards, and her love for not only this department, but also MHLC is something truly great about Jenny. Her passion for Radiology and helping the members of the community is what makes her an Excellent employee and coworker.

Thank you Jenny for being such a great coworker for us and our patients. We are lucky to have you as part of our team of Champions.
